

Eniz Dajić

Software Engineering Student

Vitez, Bosnia and Herzegovina | dajiceniz@gmail.com | 063-806-241 | [LinkedIn](#)

PROFILE

Third-year Software Engineering student with a Computer Science and Informatics Technician background. Familiar with C#, C++, and React / Next.js, with a growing focus on frontend development and embedded systems, and practical experience building responsive, component-based web interfaces.

EDUCATION

Software Engineering, Faculty of Polytechnic Studies — University of Zenica

2023 – Present

Computer Science and Informatics Technician, Mixed Secondary School Vitez

2019 – 2023

Graduated with a grade of 5 (excellent)

EXPERIENCE

Frontend Developer — Internship, RizqDev

Jul 2026 – Aug 2026

- Developed a responsive web page using React and Next.js combined with TypeScript and Tailwind CSS.

PROJECTS

GameHub — Mobile Application for Online Game Purchases

Cross-platform mobile app that lets users browse, purchase, and manage digital games.

Technologies: .NET MAUI

"Who Wants to Be a Millionaire?" Quiz

Full-stack quiz platform inspired by the TV show, with registration, login, gameplay, a results leaderboard, and a separate admin panel for managing content.

Technologies: React, TypeScript, Vite, Tailwind CSS, Radix UI, React Router, Axios, Express.js, MySQL, JWT, Bcrypt

"Ko Sam Ja?" Quiz (Live)

Bosnian-language "guess the subject" quiz game with progressively revealed clues, daily challenge and free-play modes, and score and streak tracking.

Technologies: Next.js, React, TypeScript, CSS

Wordle BA — Bosnian Word Guessing Game (Live)

Wordle-style word-guessing game for the Bosnian language, with daily and practice modes, custom handling of Bosnian digraphs (dž, lj, nj), and win/streak statistics.

Technologies: JavaScript, Vite, HTML, CSS

Demo Website

Responsive marketing website built for a German client, focused on reusable components and a consistent experience across screen sizes.

Technologies: React, Next.js, TypeScript, Tailwind CSS

Plaza — Board Game Platform for Local Gaming Communities (Live)

Mobile-first party-games launchpad for a group of friends, built as a central hub with isolated, self-contained game modules.

Technologies: Next.js, TypeScript, Supabase, Drizzle, Tailwind CSS
